<p>Commentary & Additional Information:</p>	<p>Because of the increase in clients with positive pregnancy tests, PSS has increased the number of Baby Basic classes for first-time moms from one day-long class each quarter to one day-long class every other month. They've also increased the number of breast-feeding classes from one every other month to one each month. Classes are well-attended. Participation in Baby Basics (or WISE Women, parenting education for the more experienced mom) is essential for clients to access our free baby supplies.</p> <p>Due to the nature of the living arrangements of some of PSS' clients, it is often difficult to find out when their babies are born. The number given is what PSS knows for certain. However, there are others. PSS will continue to work into January to track those women who were expected to have delivered in 2009.</p> <p>Over two thirds of pregnancy tests performed at PSS have been positive this year; many of these are abortion vulnerable. This number is higher than previous years and this is the target population PSS looks to serve.</p>
